# MINING, BUSINESS AND STOCKS.

# ANOTHER DEEP CREEK MINE GIVES PROMISE

B. H. Young Tells of Conditions in Western Camp, Which Only Waits for a Railroad.

Deep Creek gives promise of another mine which may be heard from in th near future, according to B. H. Young, who is in from there today. This is the Watson-Chandler property, consisting of eight patented claims loeated near the center of the Clifton district. Ralph Watson, who is now man aging this property, recently installed a gasoline hoisting plant at the 75 foot shaft, where two snifts of men are now at work, the intention being to sink this shaft 500 feet before stopping. This shaft, where two snirts of men are now at work, the intention being to sink this shaft 500 feet before stopping. This shaft is being sunk on the contact between lime and granite. From the grass roots down as far as the men have gone the four and a half foot vein, with a 14-inch pay streak, has scarcely varied at all in width or in values. The rock averages near 70 ounces silver, 25 per cent lead, and about \$3 in gold in the 14-inch pay ore. Considerable good ore is on the dump. The expectation is that between 300 and 460 feet down the vein will widen out and make a mine of this promising property. Most of the district is patiently waiting for the all-necessary railroad, but the Watson-Chandler people are going right ahead, knowing that the surest way to induce a railroad into the Deep Creek district is to first develop the mines, which will force the railroads in.

There are a dozen or more good properties in the district with thousands of tons of shipping ore in sight, but the inability of the owners to market the ore as mined, and in this way help to cover operating expenses, is what is keeping the district in its present backward condition. If the Gold Hill property were worked to its capacity its output alone would almost justify the coming in of the oft-promised railroad. Then there are half a dozen good ones with much ore in sight in Ferber district, only a few miles to the west. These would all patronize the Deep Creek branch and are waiting for it.

The present indications are that as scon as the Western Pacific railroad gets its main line in full operation, it will begin on its feeders, and the promise has been held out to the Deep Creek people that their branch will be one of the first to be constructed. This should be before long now, as the road is completed from Salt Lake to San Francisco; both freight and passenger trains are in operation on the various divisions, and the through service will soon be inaugurated. Construction of the Deep Creek branch might possibly be started by fall, which would

## MARKET TENDS DOWNWARD.

Morning Trading Evidenced No Startling Features.

Nevada Hills selling down as low as 1.50 was the feature of the morning session. Outside of that, the transactions were few and far between, with a downward tendency of the market. The volume of business amounted to about

#### GOING AFTER THE RECORD. Mining Dividends Passing the Mark

Set Last Year. Last year the mines of Utah paid in dividends a total of \$7,103,642, which was thought to be a pretty good showing until the statisticians began this week figuring on the dividends of the first half of 1910, which shows a total first half of 1910, which shows a total up to July 1 of \$4.382,552. If this rate is kept up for the entire year it will far exceed the 1909 record. The dividend paying Utah mines for 1910 have the following record to date:

Boston Sunshine \$	8,00
Uncle Sam Con	10,00
Daly West	108,00
Colorado	180,00
Iron Blossom	140,00
Sloux Con	29,81

## EN ROUTE TO SAMPLER.

High Grade From Nevada Superior Holds Good Promises.

Between 40 and 50 tons of high grade ore are now on the way from the Nevada Superior Mining company property in Humboldt county, Nev., to be sampled this week at Sait Lake. From the mine samples, it is estimated that it will run from \$75 to \$100 to the ton, making the shipment worth from \$4,000 to \$5,000. The ore carries values of about 70 per cent lead and 75 ounces silver to the ton. This ore was taken from one and a half foot pay streak in the 6-foot fissure vein in the 200-foot tunnel, where the men are both sinking and upraising on the shoot of ore. The ore is encountered between porphyry and lime-shale.

The Superior property consists of 18 claims located 22 miles from Humboldt, the nearest station on the Southern Pacific railroad. The wagon haul costs \$5 a ton and the freight to the Garfield smelters about \$4 a ton. The management has blocked out a large tonnage of low grade silver-lead ore, and the intention is to build a mill to handle this class. The mill will be erected some time this summer, and will be a modern 50-ton concentrating plant. vada Superior Mining company prop-

some time this summer, and will be a modern 50-ton concentrating plant.

The most costly work on the Superior property is the 2,200-foot drain tunnel which was constructed to open up several veins, but principally to tap and drain the 325-foot shaft. John W. Geiger, secretary and manager, and H. P. Saunders of Salt Lake are among the local mining men interested in the the local mining men interested in the property. It embraces all the earmarks of one of the coming big ones of Humboldt county, which is the home of some of the best mines in the state.

## FROM ANTELOPE SPRINGS.

Hand Jigged Ore on Way to Sampler From Nevada Property.

Sixty tons of hand jigged ore are now Sixty tons of hand ligged ore are now en route from the Antelope Springs Mining company property in western Nevada to Salt Lake, where it will be carefully sampled and on the result of the sampling and analysis will depend whether or not the company will immediately construct a Jigging plant at the property, which is not far from Seven Troughs. The ground shows veins rich in silver, lead and zinc, some of the ore from the 700 foot tunnel showing silver running several hundred ounces to the ton. The long tunnel has tapped the ore shoot which has been traced from the surface down 250 feet, giving a great stoping territory and the shoot is opened up for 150 feet along the tunnel. A two-foot pay streak shows three per cent lead and 30 cents gold to the ton. This is a fair average of the vein, but considerable ore running much higher in values has been mined, and the dump shows a lot of low grade ore which it is hoped a Jigging plant may handle to advantage, separating the penalized zinc from the other ores without too much cost in the operation. Dr. E. D. Woodruff of Salt Lake is one of the heavy stockholders in the Antelope. en route from the Antelope Springs in the Antelope,

The Willow Springs Mining company

Frank E. Commuskey of East Ex-Nev, is in the city, a guest at the Wil-son. He came horseback all the way from Ely to Salt Lake, a distance of several hundred miles by road, and de-clares he enjoyed his little trip.

The Commonwealth Mines company in Beaver district has struck a vein of rich silver and lead ore on a drift from the 80-foot point in the main tunnel, which is making for the old shaft where John Kelly is said to have extracted \$60,000 many years ago.

At the annual meeting of stockholders of the Bingham Copper company, held at Cheyenne, Wyo., H. U. Hart, G. E. Davis and W. D. Bohn were chosen as eastern directors, with Edward McGurrin of Salt Lake, and Dr. A. L. Lingsley of Bingham, as western

A carload of 20 tons of ore was supped to the Sait Lake smelter from Cassia county, via Burley, Ida., this week, which runs about 30 per cent lead, \$7 in silver and \$28 in gold. This rich ore is the first from the Alice mine which has considerable ore ready to be knocked down and shipped.

Great activity is assured in the Pioche district as soon as the regular schedule of trains is put on and a continuous supply of provisions, fuel and timber may be depended upon. Within the month, the indications are that several hundred miners will be put on the payrolls of the various mines.

Frank E. Horton of Berkeley, Cal, who is heavily interested in Goldfield and other Nevada mining properties, is in town on his way to Denver. Mr. Horton was at one time interested in the Goldfield Daisy, but sold out his interests two years ago at the time several Salt Lake people let go of their stock.

W. H. Anderson, J. P. Walker and W. H. Rand recently visited the Gold Chief Mining company property at Panaca, Nev. They report the condi-Panaca, Nev. They report the condition of the mine very satisfactory. The property has a depth of 500 feet, with considerable underground workings, all of which are in ore, the vein varying from 8 feet up to 40 feet, showing 200.000 tens of good ore in sight, running in values from \$7 to \$17 a ton.

The burning of the roof over the boil er plant of the Chief Consolidated mine at Tintle started a rumor on the streets of Salt Lake, Tuesday, that the hoisting plant had been reduced to ashes. The loss amounted to very ashes. The loss amounted to very little in a pecuniary way, and will not seriously interfere with the operation of the plant. General Manager Walter Fitch says the work is progressing on the 1,400 level. The last two cars shipped brought the snug sum of \$10,000.

Encouraging reports continue to come in from the various workings of the Seven Troughs Coalition Mining company property at Seven Troughs. Several rich strikes have been made the past 10 days, and the stockholders are feeling good. The strike in the Wihuja workings is showing a widening pay vein on the 500 foot level. On the third level another body of shipping ore has been encountered. Ore near the Kindergarten workings running \$60,000 to the ton is being taken out. In several other places good ore is being mined.

## **BUSINESS AND REALTY**

The Colonial Building company of this city filed articles of incorporation with the county clerk yesterday, its capital stock being placed at \$225,000 in shares of \$100 each, J. C. Daly is presi-dent, F. A. Druehl vice president; J. Q. Critchlow, secretary, treasurer and manager. These with R. P. Morris and A. B. Irvine are the directors. The company takes over the option on the Mission theater.

Appropriations amounting to \$205,000 have been made for the addition to be built in the Sait Lake postoffice. The site cost \$20,000 and \$185,000 will be expended on the building, to be erectexpended on the building, to be erected on the west side, embracing four stories and a basement. The new addition will contain offices for the Indian service, the reclamation service, the forestry, the custom office and assay department. Senator George Sutherand's recent amendment, which just passed the house, gives an addi-tional \$30,000 to the Sait Lake post-office and \$5,000 to the Park City office.

Col. Clayton will expend \$50,000 in improving the Jennings property in east First South street, following its vacating by the Sweet Candy company. The ground floor will be used for stores and a theater, and the two upper floors for rouning purposes.

# RAILROAD NEWS

## FOUR DAY SERVICE PLANNED.

FOUR DAY SERVICE PLANNED.

The American Express company is planning to establish a four days' service between New York and southern California, Sept. 1, when that company takes over the express traffic of the Salt Lake Route. It is proposed to run a through express car for the coast on the Union Pacific express train, which is to reach Salt Lake in time to be watched to the Los Angeles Limited. The American Express company operates a through express train between New York and Chicago as fast as the Twentieth Century Limited and the express train westbound from Chicago is faster than the regular passenger trains, so that express will then reach southern California from New York in better time than mail.

## NICHOLS IS SELECTED.

R. C. Nichols has been appointed general freight and passenger agent in New York for the Rio Grande and Western Pacific roads. The removal of Mr. Nichols from Chicago to New York leaves a vacancy at the latter point.

### LATE LOCALS

Daughters of the Pioneers—On Friday June 24, the Daughters of Utah pioneers will meet with Mrs. M. Y. Dougall and a program will be given consisting of a biographical sketch of the founder-general of the society, the late Mrs. Annie T. Hyde, a solo by Miss Enid Edmonds and a duet by Miss Edmonds and Mrs. Leroy Clayton. The charter members of the society will be special guests of the session.

### LOPPING OFF EXPENSES.

New York, June 22—Another \$30,000 has been lopped off the payroll of New York city by the action of Borough President McAney in discharging 44 of the city scrubbers and cleaners. The dismissals resulted from an investigation provoked by the contention that the work could be done more cheaply.

# MARKET CHEERFUL STOCKS STRONGER

concessions were shown today in the epening prices for the majority of stocks. A sprinking of gains was among the most prominent issues. The amount of business done was insignificant. Southern Pacific declined % and Illinois Central advanced.

Pacific declined % and Illinois Central advanced %.

Speculation drifted along in an aimless manner until the appearance of considerable buying orders changed the complexion of the dealings and sent prices upward. Union Pacific, Reading, Great Northern preferred, Chesapeake & Ohio, Amalgamated Copper, American Sugar, People's Gas, American Smelting, General Electric and Republic Steel preferred rose I, National Biscuit 14.

The cheerful tone of speculative sentiment was in response to the decline in wheat and reports of moderate temperature in the northwest. The quick sale of New York Central lines equipment notes indicated. In improving investment demand. United States Steel, Pressed Steel Car, interboro Met. preferred and Laclede Gas made I point gains and Westinghouse Electric 2.

Honds were firm.

Further improvement in prices was made with some particularly large blocks of United States Steel changing hands. American Sugar rose 3½, Reading and North American 2. Union Pacific 1½ and Atchison, New York Central. Southern Pacific, Missouri Pacific, Pacific Mail and International Harvester 1.

Stocks were in scanty supply at current prices and bids were raised steadily to fill orders. Trading was quiet and was mostly in the best known stocks. St. Paul. Canadian Pacific, Denver & Rio Grande, Kansas & Texas, Colorado Fuel, the Southern Railway stocks and St. Louis and San Francisco second preferred advanced to 1½ and Illinois Central 19.

The market closed firm. Stocks started up again, reaching the highest point of the day. The movement was somewhat vanced %. Speculation drifted along in an aimless speculation drifted along in an aimless

rered advanced to 1% and linnois Central 1%.

The market closed firm. Stocks started up again, reaching the highest point of the day. The movement was somewhat sharp in some of the ress active issues, but slight gains were common. American Sugar rose 4. Chicago Great Western preferred 3. Southern Raliway preferred 2½, St. Louis Southwestern 2. and Louisville & Nashville. Atlantic Coast Line, Toledo, St. Louis & Western, American Car, Amalgamated Copper, Brooklyn Union Gas, Chesapeake & Ohio and American Beet Sugar 1½ to 1%.

St. Louis, June 22—Wool, unchanged. Perritory and western mediums, 17@22; ine mediums, 16@17; fine, 12@14. BOSTON.

BOSTON.

Boston. June 21—The local market for wool remains listles, with scarcely any inquiry and fewer sales. Local dealers have made few purchases in the west, believing that prices there are still top figh. Milts are curtailing, and while the light goods market opens soon, there is no demand for raw material in sight. A fair demand is reported for the foreign product. Quotations:

## PRODUCE.

CHICAGO.

CHICAGO.

Chicago, June 22.—Temperatures not nearly so excessive and showers reported at a number of points made the outlook for the spring wheat crop seem much less forbidding today.

Moreover, cable dispatcles falled to show much excitement in Europe over conditions in America. Dry weather in Argentina and Russia had been relieved and foreigners appeared to regard themselves as practically independent of this country. The elimination of a large short interest here and the fact that the majority of the speculators were pretty well loaded with wheat, tended also to induce a bearish reaction. In addition showers were preglicted officially for tonight or tomorrow. Heavy and general liquidation started with the first tap of the bell. The market opened excited 1% 61% lower to a shade higher with Sentember covering the extreme range at 96% to 98. Rapidly fluctuating downward, the price of that option reached as low as 96%.

Corn was weak on scattered selling in which pit traders and local longs led. There was, however, some fairly good commission buying. September opened unchanged to ½ off at 60% to 61 and touched 60%.

Longs were selling oats though not on a large scale. September started % 62% to 46% down at 38% to 3% rallied to 39 and fell back to 28%.

Provisions were heavy because of the big run of hogs west and on account 3 the weakness in grain. The largest decline was in pork which railed a little in trading. First prices were down all the way from 5 to 70 cents with the September delivery at 22.40 for pork. 12.43% for ribs.

Wheat—The decline continued until September reached 86%. Then on drouth reports from western Kansas and because of renewed calamity reports from North Dakota, a rally ensued but was soon overcome by official forecast of a break in the hot wave. The close was weak with September at 22%, a net loss of 2% (27).

Corn—The market followed wheat down but showed little power of recuperation. The close, however, was steady, with September at 59% @ 1/2, a net loss of 1/4

September at 59% @ 1/4, a net loss of 11/4 @ 11/4.

# SOME DESERT **EXPERIENCES**

Herbert Masters, Young Mining Engineer, Tells of Party Crossing Borax Lake, Cal.

#### ONE OF THE PARTY PERISHED

All Suffered Terribly in Intensely Hot Sun-Finally Saved by Some Automobilists.

Berkeley, Cal., June 22 .- His condition bordering upon a state of nervous collapse and hardly able to tell the story of his terrible experience, Herbert Masters, the young mining engineer, who was a member of the Borax lake expedition in which Charles Stracher Davidson, a graduate of the University Davidson, a graduate of the University of California mining college, lost his life in the intense heat last Friday, returned to his home in this city last night. He left the five others of the party at Randsburg after the burial of Davidson in a rude grave on the desert by the shores of the lake where he met his death. All of the others suffered terribly, but managed to make camp after 24 hours of torture in the broiling sun. broiling sun

camp after 24 hours of torture in the broiling sun.

"We arrived at Randsburg last Thursday and started on our trip across Borax lake on Friday," said Masters. "The lake is a mud deposit covered by a heavy crust. Our objective point was an old camp on the opposite shore where we thought we would find some prospectors. When we commenced drawing our line, Davidson became prostrated with the heat, which was terrific. A little later he collapsed, Then he broke away from us, and running about 50 feet, fell on his face. One of the boys went back to him. He died shortly afterward.

"One by one we followed a course toward the opposite shore. When I arrived I discovered that there was no water. After several hours we found an old well, but the water was sulphurous and salty and at the bottom was a dead rattlesnake. Two of the original party of seven had gone to Randsburg for batteries when we started on the trip accross the lake and left four of us huddled together.

"There were Thomas A. Graves, a mining expert of Clean, N. Y.; David Bunkers, Norman Stein and myself." In the morning before sunrise we took a roundabout trail skirting the

Bunkers, Norman Stein and myself.

"In the morning before sunrise we took a roundabout trail skirting the lake. When half way to Randsburg we met an automobile party and were carried the rest of the way in the machine. That afternoon we went out on to that seething mud lake once more and got the body of Davidson. The boys made a rough pine box and we gave George the most decent burial we were capable of. The ritual was not much, but its was the best we knew. His grave is out there under that sun close to where he died.

"The others of the party are pretty badly used up, but they will be all right. It was a terrible experience and I am through with the desert."

#### TWO ARE ARRAIGNED.

George Hart and Paul Hubbard, both charged with statutory offenses in which the principal witnesses are young girls, appeared before Judgh Bowman this morning but continued their pleading until tomorrow.

#### T. ROOSEVELT, JR., REGISTERS AS ROGERS

Chicago, June 22.—Theodore Roosevelt, Jr., and bride, registered at the Congress hotel here today as "Wm. Throop Rogers and wife, Philadelphia," but the newly wedded husband eventually admitted his identity.

A tall Iowan who came on the same ain with the bride and groom was train with the bride and groom was responsible for the discovery of the identity of the pair.

"Know who that couple is?" he remarked to the clerk as Mr. and Mrs. Roosevelt, Jr., were moving away.

"Sure, Wm. Throop Rogers and wife, Philadelphia, suite B, 13."

"William Throop your grandmother! That's T. R. Jr., and better half. I came on the same train with 'em and she didn't call him "Bill"—she called him 'Theodore'."

"Theodore".

him "Theodors."

Reporters could not at first obtain an answer from B 13 but after repeated rappings, a young face, lit up by a prodigious grin projected itself through the slightly open door.

"I'm Roosevelt all right," he sa'd, "but I can't talk to you now."

Mr. and Mrs. Roosevelt, Jr., ars an their way to San Francisco, their furture home.

ture home. Later Mr. Roosevelt greeted the newspaper men more formally.

"Really," he said, "we had hoped avoid recognition. I know that an interest taken in me is purely reflected. I can't say just when we will leave Chicago, but we will be in San Fran-cisco by Aug. 1. I go to work there as assistant to the sales manager of the carpet house."
